Notes:

- Participants, eligibles, and participation rate in each State as reported in *Reaching Those in Need: State Supplemental Nutrition Assistance Program Rates in 2009*.
- The estimated number of potential new participants is based on assumption that each State's participation rate would increase by up to 5 percentage points.
- The adjusted average benefit among non-participants is assumed to be 25.98 percent of the average among participants in each State.
- Total economic activity is assumed to be equal to 1.8 times the value of total annual benefits in each State.
- Sum of rows may not equal total due to rounding.
